

Question 1: House Price Prediction using Linear Regression

Objective

To predict house prices using the Linear Regression algorithm and evaluate the model using the R^2 Score.

Output:

```
● (base) bhanu@Bhanus-MacBook-Air C01-ASS1 % python House_price.py  
Actual price= [280000 300000]  
Predicted price= [285614.85602094 302762.10732984]  
R2 score= 0.8042207748125798  
❖ (base) bhanu@Bhanus-MacBook-Air C01-ASS1 %
```
